## 2006 honda civic hybrid battery price

I would not have to wait and wait for a core deposit. I returned battery exactly as should have and can't get an answer from anyone. Actually haven't even been able to speak to anyone as phone goes to voicemail. Was this review helpful to you? 0

1 of 1 people found the following review helpful: 2008 Honda Hybrid Battery! October 9, 2018  
Reviewer: Richard Flores from Justin, TX United States Hey guys want to thank you for my fast responses to my emails and fast service at your Richardson store where they installed the battery. So far working good. The car passed inspection and my daughter is happy to have her car back! Was this review helpful to you? 1

However, you don't have to fall within that age range to appreciate its many great features. Most experts consider it a good investment, because it's stylish, comfortable, reliable, safe, fuel-efficient and it performs well. As of 2016, it's in its eighth generation, and it continues to know how to please drivers and passengers alike.

The tenth generation of the Civic saw passengers receive over three more cubic feet of extra space, something that is unparalleled in this particular class of vehicles. While some compact vehicles have cramped back seats, the Civic doesn't, and it also offers plenty of head room. Best of all is the 15.1 cubic feet of cargo space. The Civic was already known for having plenty of space in its trunk, but the tenth generation made it even roomier which means you can fit your luggage, strollers, groceries and whatever else you need. 2. The Entertainment SystemThese days, the entertainment system in a car is just as important as its other features, and the tenth generation Honda Civic doesn't disappoint. Smartphone integration is seamless with options for both Android Auto and Apple CarPlay. It also comes with SiriusXM satellite radio. Previous generations of the Civic didn't have either. Aside from the base LX model, the car comes with a touchscreen display, and all versions come with Bluetooth and audio connections with steering wheel controls. Depending on the model, you can get a 160-watt, 180-watt or 450-watt sound system. The 450-watt option even has navigation integrated into the system. 3. The Safety FeaturesIf you're looking for a car that's safe — and who isn't? — you can't go wrong with the Honda Civic. The National Highway Traffic Safety Administration awarded it the organization's top safety rating, and the Insurance Institute for Highway Safety claims the car beat every single one of its collision tests. Even the most basic model of the Civic comes with advanced safety gear, including sensors for adaptive cruise control, lane and road-leaving detection, forward collision warning, blind spot monitoring, rear cross traffic alert and automatic emergency braking. Depending on the model you choose, you'll find more bells and whistles than you could shake a stick at. And if you buy, you have another great option available to you, but no matter what you decide, you can count on getting the standard engine and transmission package. The Civic's base engine is a 174-hp and up to a 181-hp turbo. Because of the little turbo engine, you may think there's more gas-guzzling than there has to worry about, but considering you've taken off at stop lights or trying to make a quick turn up busy traffic. Combine that with auto gile and easy-to-drive the tenth generation Honda Civic is, and it will find quite a measure to take out on the road. 5. The Gas MileageE A car's gas mileage may not be one of its sexiest features, but it's definitely something you'd want to know about unless you have money to waste. And since you probably don't, you'll be happy to know that fuel efficiency is one of the Honda Civic's most beloved features. Thanks to the new design that was introduced in 2016, the Civic now gets 31 miles per gallon in the city and 42 on the highway if you opt for an automatic transmission. This makes it a great car for anyone who commutes long distances to school or work each day, as well as anyone who likes to stick to a budget. MORE FROM QUESTIONSANSWERED.NET
